

Clean fuel is essential

Since water is potentially the most harmful contaminant in your fuel system, Baldwin Filters developed a line of heavy-duty fuel/water separators that are both rugged and reliable. Baldwin's fuel/water separators incorporate a heavy-duty, one-piece housing and other design features that eliminate the risk of failure associated with designs that use plastic bowls.

The DAHL®/Baldwin line of products provides additional protection to diesel fuel systems. DAHL fuel filter/water separators remove virtually 100% of the water and solid contaminants from your fuel system. The key to providing such efficient removal of contamination is DAHL's patented depressurizer cone and the design of the dual-chamber 3-stage fuel filter/water separator.

Clean fuel provided by a DAHL diesel fuel filter/water separator eliminates nearly all of the engine problems caused by water and solid contaminants in diesel fuel. In addition, you can expect:

- Longer Injection System Component Life
- Full Power Performance
- Lower Element Replacement Cost

Depend on Baldwin Filters

Protect your equipment with heavy-duty Baldwin filters. When it comes to coverage, Baldwin Filters provides the widest range of heavy-duty lube, air, fuel, coolant, hydraulic and transmission filters in the industry.

Baldwin consistently manufactures filters designed to meet or exceed the quality, performance and supply requirements of original equipment and aftermarket customers.
